

ECCL 2008 Action Shooting Report

Wow! Another year under our belts, where does the time go? A cold, blustery day was the best way to describe our shoot, however it was one of our largest attended. Last one of the year, we had another "Rodvold" project that worked out great. Keith made a turning target system running off of a wiper motor and 12 volt battery. Thanks again Keith for making this action shoot interesting. In fact, Thanks to everyone that shows up early, or stays late (some do both) to help with set up and clean up. If I had to do it all, I probably wouldn't do it, so thanks guys I truly appreciate it. Also to my "go to" guys that always help me run the event, Brian W., Vince, Jim, Brian C, Doug, and to all that have stepped up thanks!!

End of year stats are up, I hope they can be posted on the website. My math is not perfect and if I messed up a name I apologize now, but with my feelings toward this program I guess I set the standards. With that said, I compiled all shooters scores reflecting an average of all scores over this years six events (November does not count)

I then sorted these scores into that number of attended events. I feel that attendance is important and it benefits the Erie County Conservation League. Rather than having one shooter show up once or twice and "taking it all" I would rather have the people that are here all of the time benefit as again, the club benefits. I broke down the scores into the four main categories, Revolver, semi-auto pistol, action rifle iron sights, and optical sights. I ran the scores and came up with the following for our top shooters:

I am looking at next year already trying to think of ways to make it a little more fun. I am always open to ideas and fun-safe thoughts that would work for what we do.

I must say a couple of years ago when we started this event I was somewhat apprehensive, however now, I am proud of our shooters. You all have improved in accuracy, speed, and safety. You went from static shooting techniques to moving and shooting, transitioning from long gun to handgun, to moving and shooting, transitioning and using tactics all at the same time. You all are doing great and we should all be proud. Thanks to everyone for another fun and safe year!

Thanks, Robb
